ycqi312@gmail.com | +44 7424 159195 | London, UK

Education

Imperial College London

MSc Applied Computational Science and Engineering

Sep 2025 - Sep 2026

Soochow University

Bachelor in Software Engineering | GPA 3.8 / 4.0

Sep 2021 - Jun 2025

Research Experience

Causal Inference for Diet Coke and Obesity

First Author | Collaboration with Florida State University

Dec 2023 - Aug 2025

Investigated diet soda consumption and obesity using **structural causal models** and NHANES data. Applied back-door adjustment and counterfactual analysis to estimate the Probability of Necessity and Sufficiency across population groups. Collaborated with Dr. Ang Li and produced a first-author arXiv preprint.

Causal Analysis of Influenza Vaccine Effectiveness

First Author | Collaboration with Florida State University

May 2024 - May 2025

Studied influenza vaccine effectiveness across different populations using **causal inference** methods, in collaboration with Dr. Ang Li at Florida State University.

Publications

Qi, Y. and Xiong, X. (2026). The Missing Corner: When Sharp Causal Bounds Fail to Compose. arXiv preprint. [arXiv:2610.08197](#)

Qi, Y. and Xiong, X. (2026). Same Predictions, Different Harms: Causal Auditing of Patient World Models. **Accepted at WMHS** (World Models for High-Stakes Health), NeurIPS 2026 Workshop. [Paper](#) | [arXiv:2610.05198](#)

Qi, Y. and Li, A. (2024). Causality in the Can: Diet Coke's Impact on Fatness. arXiv preprint. [arXiv:2405.10746](#)

Internship Experience

Soochow Securities Co Ltd

AIGC Intern | Suzhou, China

Jul 2024 - Sep 2024

Trained and optimized **AI models for financial applications**, covering data processing, feature engineering, model development, evaluation, and deployment. Worked with business teams to align models with application requirements.

Yicheng Qi

Technical Projects

Diffusion Models for Sequential Recommendation

Project Member | National Student Innovation Project

Apr 2023 - Apr 2025

Contributed to a diffusion-based recommendation model under Prof. Pengpeng Zhao. Validated performance using **Hit Rate and NDCG**, with results above most compared methods in project experiments. Integrated the model with code-completion and ChatOffice modules.

Code Recommendation and Completion with Transformers

Project Member | Provincial University and Enterprise Project

Apr 2022 - Apr 2024

Implemented and debugged the core algorithm of a code recommendation and completion system combining **abstract syntax trees** with a Transformer architecture. Supervised by Associate Prof. Wangshu Yao and Senior Engineer Yunkang Wu.

Biomedical Text Analysis

Team Leader | Imperial College London Summer School

Jul 2023 - Aug 2023

Led a team applying natural language processing to biomedical noun associations and developed a disease-symptom diagnostic demo. Received the **Best NLP Project Award**.

Honors and Awards

First Prize Academic Scholarship (Top 5%) - Soochow University.

First Prize Innovation and Entrepreneurship Scholarship (Top 5%) - Soochow University.

Ministry of Education **"Smart Dock" Scholarship**.

Finalist, Mathematical Contest in Modeling / Interdisciplinary Contest in Modeling (MCM/ICM).

Intellectual Property

National invention patent: A Software Development Management System. Software copyright: An Intelligent Campus Online Management System.

Leadership

Huawei Student Developers Club

Student Ambassador

Oct 2021 - Jun 2025

Soochow University Student Union

Management Committee Chairperson | Computer Science School

Oct 2021 - Oct 2022

Research and Technical Methods

Structural causal models, counterfactual analysis, NLP, Transformers, diffusion models, sequential recommendation, model validation, and deployment.
